

WIN a \$3000 AV MEDIA SYSTEMS INTERACTIVE WHITEBOARD AT THE ECAWA 2007 CONFERENCE!

Craig Renshaw - Director **av** media systems WA

Interactive Whiteboards are revolutionising the way we teach, train and present. Whilst retaining the ability to capture and print the contents of the whiteboard, the interactive whiteboard takes it to the next level.

When used with a multimedia projector, the board allows full mouse control of the computer. Furthermore you can annotate over the computer's and video images, replay captured data, email on the fly, save then distribute content and much much more....

The **av** media board can replace the traditional whiteboard and blackboard, the projection screen, the flipchart and the copy board completely. It makes presentation far more interactive and effective for the visual learner.
