

Workcard

CD32W1

Level: 3

Strand: Chance and Data Substrand: Collect and Organise Data

Coming to School

Do in groups of 4/5

I want to know how each person comes to school what info would I collect? Draw a table to collect the info in.

How many people came by each method.

If your table had a total column you could tell how many people you asked. Did your table allow you to answer these question?

How many people came by bike?

How many girls came by car?

How many year 9's walked?

Change your table so that you can collect data to answer these questions and recollect the data. Now answer the questions above.
