Hey Lets Survey

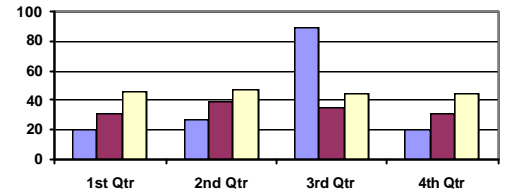

If you wanted to improve the school, what could you do?

Who could you ask?

What questions could you ask?

Are you going to ask about the whole school or part?

If just a part what part? Canteen, classrooms, yard or subjects?

Write a survey to help find out how to improve the school.

Write ten questions each with four answers (multiple choice)

Then write two open ended questions where people can give any answer.

Go and survey at least 20 people in class

Collect your results

You must then present the information in tables and graphs.

Make a DRAFT brochure on how the school can be improved. Using the answers to your questions as evidence.

You can use drawing and pictures to improve you brochure.

Once you have done your draft show it to your teacher.

If possible type the brochure into a computer to improve the presentation.

Reflection

What did you find out?

What thing in the school could be improved?

What new things have you learnt?
