

Work card

Number

M41w1

Level: 4

Strand: Measurement

Substrand: Understand Units

What units do what?

What units do we use to measure the following? List as many different things as possible.

Length
Area
Capacity
Volume
Mass
Angles
Time

What things do we use to measure the following attributes? List as many different things as possible.

Length
Area
Capacity
Volume
Mass
Angles
Time

Check with the teacher to make sure you are correct.

Now on a A4 piece of paper draw a poster about one of the quantities Length, area, time etc. On the poster place the name of the Attribute, a list of units used to measure it and at least two diagrams of things we use to measure it.

Reflection

What did you do well in this activity?

What could have you improved?

What new things have you learnt?
